

AI Dentist SOP Starter Pack

Sample — AI Use-Case Intake SOP

This sample demonstrates the style and scope of the digital SOP templates included in the AI Dentist SOP Starter Pack.

AI Use-Case Intake SOP

Purpose: Create a simple review process before a dental team uses an AI tool for administrative, marketing, or internal workflow tasks.

Approved Use Cases

- Drafting internal checklists from already-approved practice procedures.
- Summarizing non-patient-specific meeting notes.
- Creating first drafts of educational content for human review.
- Organizing recurring admin tasks into templates.

Not Approved Without Separate Review

- Entering patient health information into unapproved tools.
- Generating diagnosis, treatment, medication, or clinical instructions.
- Publishing patient-facing content without human review.
- Representing AI output as final professional advice.

Team Checklist

1. Confirm the task does not require protected health information.
2. Select an approved tool and approved prompt template.
3. Review output for accuracy, tone, and compliance boundaries.
4. Assign a human owner for final approval.
5. Save the final SOP or document in the approved practice location.

Human Review Standard

Every AI-assisted output must be reviewed by a qualified team member before it is used in operations, training, or patient-facing communication.
