

# Clinical Admin Workflow SOP Bundle

## Sample — Meeting Notes to Action Register SOP

This sample demonstrates the style and scope of the administrative workflow templates included in the Clinical Admin Workflow SOP Bundle.

### Meeting Notes To Action Register SOP

Purpose: Turn dental team meeting notes into clear tasks with owners, due dates, and next actions.

#### Inputs

- Meeting date.
- Attendees.
- Discussion notes.
- Decisions made.
- Open loops.
- Follow-up owners.

#### Output Format

| Action                            | Owner                | Due Date | Next Action                                      | Status |
|-----------------------------------|----------------------|----------|--------------------------------------------------|--------|
| Document ledger posting procedure | Office lead          | Friday   | Confirm final steps and training gaps            | Open   |
| Review schedule bottlenecks       | Doctor + office lead | Tuesday  | Identify top two appointment types spanning long | Open   |

#### Quality Standard

Every action must have one directly responsible owner. If an item has multiple contributors, list one owner and name the supporting roles in the notes.

#### Review Rhythm

- Review open tasks weekly.
- Close tasks only when the output is documented or assigned to a new workflow.
- Move unclear items into a parking lot instead of letting them disappear.
